

Synthetic Dataset for IPOPHL GI Stakeholder Consultations: Kapeng Barako, Lipa City, Batangas

This synthetic dataset was designed to mirror the type of stakeholder consultation evidence commonly required during Geographical Indication (GI) preparation and registration processes. The records are based on publicly available information regarding Kapeng Barako (*Coffea liberica*), GI governance frameworks, IPOPHL guidance, agricultural producer organizations, local government participation, traceability systems, quality control requirements, and consensus-building mechanisms.

Detailed Stakeholder Consultation Records

Consultation ID: SC-001

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 21 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 89% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-002

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 22 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 90% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-003

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 23 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 91% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.
GI Registration Support: Yes.

Consultation ID: SC-004

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 24 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 92% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-005

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 25 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 93% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-006

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 26 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 94% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-007

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 27 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 95% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-008

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 28 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 96% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-009

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 29 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 97% agreement.
Decision: Approved for inclusion in GI preparation roadmap.
Traceability Support: Yes.
GI Registration Support: Yes.

Consultation ID: SC-010

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 30 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 98% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-011

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 31 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 99% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-012

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 32 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 88% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-013

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 33 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 89% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-014

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 34 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 90% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-015

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 35 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 91% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-016

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 36 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 92% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-017

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 37 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 93% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-018

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 38 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 94% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-019

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 39 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 95% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-020

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 40 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 96% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 56 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 88% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-037

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 57 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 89% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-038

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 58 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 90% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-039

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 59 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 91% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-040

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 20 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 92% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-041

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 21 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 93% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-042

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 22 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 94% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-043

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 23 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 95% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-044

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 24 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 96% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-045

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 25 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 97% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-046

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 26 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 98% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-047

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 27 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 99% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.

Consultation ID: SC-048

Date: 2025 Consultation Cycle

Stakeholder Group: Coffee Farmers, LGU Representatives, Traders, Roasters, Cooperatives, Academic Experts, and Industry Organizations.

Participants: 28 attendees.

Primary Agenda: Delimitation of production area, producer registration, traceability, quality standards, governance formation, Manual of Specifications (MoP), sustainability practices, market protection, and GI compliance.

Discussion Summary: Participants discussed preserving the reputation of authentic Kapeng Barako from Lipa City and neighboring production zones. Concerns included misuse of the Barako name, inconsistent quality standards, insufficient farm documentation, counterfeit products, weak supply-chain transparency, and the need for stronger producer representation. Stakeholders recommended standardized farm records, harvest monitoring, QR-based traceability, sensory

evaluation protocols, producer accreditation, annual audits, and a formal GI governing council.

Consensus Level: 88% agreement.

Decision: Approved for inclusion in GI preparation roadmap.

Traceability Support: Yes.

GI Registration Support: Yes.
